

elmur.net collaborates with Studio & Frank and Lisa inside the context of the Noorderzon Festival in Groningen, Netherlands

elmur.net will be projected in a 6 meter high fountain, the Aqua Luma project created by AVL-Concept, Noorderzon and Studio Frank & Lisa.

The name Aqua Luma means lots of liters or 2000 liters. An immense water pump will spit out water in liters per minute, and cause a powerful water screen to arise, on which work of film makers, designers, choreographers, photographers, veejays and artists will be projected.

Aqua Luma will be placed at the Plantsoen Park in Groningen inside the context of the Noorderzon Festival from the 20th to the 29th of August, every night from 21:00 p.m. elmur.net collective movie created by means of user's videos will be placed at this amazing space the night of the 26th.

The screenings have been curated by the prestigious design studio "Studio Frank & Lisa", a young and innovative creative studio which represents an exelent sample of what Netherlands offers inside the contemporary design scene.
